## South Australian Cyber Industry Capability

statedevelopment.sa.gov.au/cyber

## Fostering a safe and secure cyber industry

Cyber security protects our digital infrastructure across all facets of personal life and business affairs. Staying safe online and protecting personal data and sensitive business information has become increasingly crucial in today's digital age.

We are committed to fostering cyber capability development, innovation, and commercialisation across South Australia, through collaboration with government, industry, and research institutions. Cyber security is a high economic value sector that has been prioritised for growth in the state and across Australia, and we are proud to play a key role in accelerating this growth.

To support effective cyber security practices within the state, we have compiled Cyber Capability Matrix of leading South Australian organisations and the areas of cyber security they specialise in, including:

**Governance and identification** 

**Protection** 

**Detection and response** 

Cyber research

## South Australian Cyber Industry Capability Matrix
