

South Australian Cyber Industry Capability

diis.sa.gov.au/cyber

Government
of South Australia
Department for Industry,
Innovation and Science

Fostering a safe and secure cyber industry

Cyber security protects our digital infrastructure across all facets of personal life and business affairs. Staying safe online and protecting personal data and sensitive business information has become increasingly crucial in today's digital age.

We are committed to fostering cyber capability development, innovation, and commercialisation across South Australia, through collaboration with government, industry, and research institutions. Cyber security is a high economic value sector that has been prioritised for growth in the state and across Australia, and we are proud to play a key role in accelerating this growth.

To support effective cyber security practices within the state, we have compiled Cyber Capability Matrix of leading South Australian organisations and the areas of cyber security they specialise in, including:

Governance and identification

Protection

Detection and response

Cyber research

South Australian Cyber Industry Capability Matrix

SA Company	Govern / Identify				Protect (including critical infrastructure and security architecture)							Detect & Respond						Research
	Risk & Compliance	Professional Services	Education & Training	Managed Security Services	Information, mobile and messaging security	IoT Security & 3rd Party Mgmt	Identity and access management	Encryption	Network (Firewall & VPN)	Endpoint, Application Security and Whitelisting	Cloud Security	Threat Intelligence / Detection	Penetration Testing	Security and behavioural analytics	Active Defence (Red teaming, deception, threat hunting)	Incident Response	Security orchestration / Security information and event management (SOAR/SIEM)	R&D
