| University of Adelaide                 | RCP 15 Agricultural Product Development     | The Agricultural Product Development program explores extracting valuable products from agricultural waste for commercial and industrial application, focussing on identifying and characterising carbohydrates and bio-actives from crop waste. The program builds collaborations between local businesses, international food companies, and researchers.  | 20/12/2018         | 31/07/2023       | 3,476,981     |
| SA Museum                              | SA Museum (Inspiring SA)                    | Inspiring SA works collaboratively with scientists, government agencies, citizen scientist, arts organisations, universities, and industry to provide South Australians with opportunities to connect with, be involved in and excited about science, technology, engineering, maths and medicine (STEMM) and to improve scientific literacy.  | 31/10/2019         | 30/06/2020       | 120,000       |
| Central Adelaide Local Health Network  | SA Cell Matrix Service                      | The South Australian Cell Matrix Service Biospherix Facility will support the remodelling of SA Pathology, the provision of a clean room to house the Biospherix system, provide training to use the Biospherix system, and research reagents for islet isolation.   | 25/12/2019         | 31/12/2022       | 380,900       |
| University of South Australia          | Mask Testing Facility                       | Establishment of a testing facility at Mawson Lakes to assist, in the first instance, Detmold test their new face mask products (both P2/N95 masks and surgical Level 3 masks). This activity aligns with the South Australian Government's commitment to COVID-19 response and aims to enhance research collaborations with industry to address a public health need.   | 18/06/2020         | 15/06/2024       | 91,000        |
| Flinders University                    | Flinders University (Mask Testing Facility) | Establishment of a testing facility at Mawson Lakes to assist, in the first instance, Detmold test their new face mask products (both P2/N95 masks and surgical Level 3 masks). This activity aligns with the South Australian Government's commitment to COVID-19 response and aims to enhance research collaboration with industry to address a public health need.  | 18/06/2020         | 15/06/2024       | 359,000       |
| Defence SA                             | SmartSat Cooperative Research Centre        | The SmartSat CRC is developing the know-how and technologies in advanced telecommunications and IoT connectivity, intelligent satellite systems, and Earth observation next generation data services. The CRC will build Australia's space industry through creation of the next generation of specialist professionals and establish a nationally coordinated ecosystem of space research-industry collaboration. | 29/07/2020         | 30/06/2027       | 600,000       |
| South Australian Space Industry Centre | SASIC Feasibility Study                     | The joint feasibility study between Myriota, Inovor, and Neumann supports space mission capability growth in South   | 24/09/2020         | 30/09/2020       | 50,000        |

|                                 |  | Australia and demonstrates to investors the potential of SA technology to power space payloads in future.  |                    |                  |               |
| University of Adelaide          | Australian Research Council Centre of Excellence for Dark matter particle physics                      | The ARC Centre of Excellence for Dark Matter Particle Physics brings together experts from across Australia and internationally to unlock the secrets of dark matter and foster the science and engineering leaders of the future. The Centre aims to extend physical models of particle physics, discover the nature of dark matter, and directly detect dark matter in Australia and at the Large Hadron Collider in CERN.   | 24/10/2020         | 30/06/2027       | 300,000       |
| Department of Energy and Mining | Reliable, Affordable Clean Energy for 2030 Cooperative Research Centre                                 | The RACE for 2030 CRC is leading collaborative research and innovation to reduce costs to businesses, enhance reliability, cut carbon emissions, improve energy affordability, and develop Australian energy technology businesses. The CRC aims to play a significant role in achieving Australia's target of reducing emissions by 43% by 2030 by driving innovation and accelerating the shift to a Reliable, Affordable and Clean Energy transition.   | 12/12/2020         | 30/06/2030       | 300,000       |
| Department of Energy and Mining | Future Battery Industry Cooperative Research Centre  | The Future Battery Industries CRC is enabling the growth of battery industries to ensure Australia plays a leading role in the global battery evolution. The CRC will expand Australia's battery minerals and chemicals production develop opportunities for specialist battery manufacturing support the deployment of batteries to households, communities and industry and optimise the circular economy for the use and re-use of battery systems.   | 12/12/2020         | 30/06/2025       | 150,000       |
| University of South Australia   | Australian Research Council Centre of Excellence for Enabling Eco-Efficient Beneficiation of Materials | The ARC Centre of Excellence for Enabling Eco-Efficient Beneficiation of Minerals is developing transformational technologies for enabling a competitive and environmentally sustainable future for Australia's minerals industry through a reduced environmental footprint, significant reductions in energy and water use and higher resources recovery. The Centre will transform the minerals industry, establishing a new generation of research leaders to support the innovation needed in creating a green economy for future generations. | 13/02/2021         | 30/06/2027       | 300,000       |
| University of Adelaide          | Growth State Virtual Fencing   | The Virtual Fencing project will work towards the commercialisation of virtual fencing technology in South Australia. Researchers will work with industry and technology providers to investigate the animal welfare impact of virtual fencing technology, undertake in-field/on-farm trials, and  | 22/06/2021         | 31/08/2023       | 1,000,000     |

| Org Name                  | Project Title                               | Project Description   | Funding Start Date | Funding End Date | Grant Funding |

| Presagen Holdings Pty Ltd T/A Life Whisperer | Development of an AI platform for image based medical diagnostics, and commercialisation of Life Whisperer, a product that uses AI to identify viable embryos for IVF. | Presagen is commercialising artificial intelligence for more accurately assessing medical imaging to improve IVF outcomes. The project will support regulatory approval, market entry and clinical studies for an embryo genetic assessment product.  | 8/06/2019          | 30/06/2020       | 1,500,000     |
| QuantX labs Pty Ltd (Cryoclock Pty Ltd)      | Commercialisation of an ultra-stable signal source.  | Cryoclock is commercialising innovative sapphire clock technology with superior timing precision for enhanced radar performance in defence and civilian markets. The project will develop the technology from a laboratory prototype to a robust commercial product that is deployable with identified defence customers                        | 24/08/2019         | 30/06/2020       | 100,000       |
| Neumann Space Pty Ltd                        | Electric propulsion system for cubesats  | Neumann Space is developing a compact, efficient, and scalable in-space electric propulsion system for satellites. The project will help develop and test its propulsion system ready for launch.   | 2/09/2019          | 30/06/2022       | 850,000       |
| MEQ Probe                                    | Commercialisation of Next Generation Meat Eating Grading Device.   | MEQ is commercialising its technology using laser probes and machine learning to objectively measure the eating quality of red meat for global markets. The project will conduct pilot trials with lead customers to improve the accuracy of its machine learning models ready for market entry and first sales.                                | 2/10/2019          | 30/04/2021       | 350,000       |
| TCPinpoint Pty Ltd                           | Mobile Application Suite   | TC Pinpoint are commercialising a project management software tool to save time and money for the global market for building retail tenancies. Th project will develop robust mobile applications, based on customer feedback, to accelerate market adoption.   | 15/10/2019         | 30/11/2021       | 100,000       |
| Climate Change Technologies Pty Ltd          | Commercialisation of CCT Energy Storage's Thermal Energy Device (TED), a ground- breaking alternative for industry to traditional battery storage.                     | CCT is commercialising an innovative thermal energy storage device using phase change materials as a better alternative to conventional batteries. The project will deploy and conduct a field trial with a potential customer, audited independently to demonstrate the technology benefits and to help planning for a manufacturing facility. | 15/11/2019         | 31/01/2021       | 582,000       |
| Safe Ag Systems Pty Ltd                      | Safe Ag Systems will build additional modules,   | Safe Ag Systems provides a digital compliance and reporting solution for farmers to better manage workplace safety risks  | 1/12/2019          | 30/08/2020       | 500,000       |

| Org Name  | Project Title   | Project Description   | Funding Start Date | Funding End Date | Grant Funding |
|---|---|---|--------------------|------------------|---------------|
|   | allowing them to accelerate & respond to market demand, scale commercial efforts & automate internal processes to service growth and expansion. | and requirements. The project will increase functionality and improve internal business processes for scaling.  |                    |                  |               |
| First Frontier Pty Ltd, trading as Frontier Microscopy (FM) | MARVIN the robotic microscope   | Frontier Microscopy are commercialising its automated optical technology for faster and more efficient analysis of airborne asbestos. The project will attempt to manufacture and trial prototype units in different settings with independent laboratories to improve manufacturability and reliability.   | 1/02/2020          | 31/03/2021       | 210,000       |
| The Village Foundation                                      | Innovative mentoring program to address perinatal wellbeing.  | The company is developing an app with a perinatal mental wellbeing pilot program to improve productivity in the workplace for mothers returning to work. The project will complete web-based training modules and on-boarding materials and roll out the pilot to agreed participating companies with onsite training and development events.                         | 3/06/2020          | 30/09/2022       | 50,000        |
| Ping Services (Ping Monitor Device No. 1)                   | Ping Monitor V2.1   | Ping Services is developing the Ping Monitor, a device that uses AI and acoustic monitoring to deliver accurate and cost-effective monitoring of wind turbine blades to help prevent catastrophic failure. The project will complete the design of a market ready version of the device- and manufacture 100 units for field testing with potential global customers. | 7/06/2020          | 15/01/2021       | 100,000       |
| Fusetec 3D Pty Ltd  | Medical Training Device Collaborative Development   | Fusetec is developing 3-D printed synthetic human anatomy medical training devices for more cost effective and repeatable training for complex or rare surgery. The project will develop a comprehensive digital library of segmented human anatomies for fully operable 3-D printed synthetic human anatomy medical training devices.                                | 7/06/2020          | 30/11/2021       | 500,000       |
| CareApp Group Pty Ltd                                       | Rapid expansion of a smartphone app that connects aged care residents with their families and care providers.                                   | CareApp has developed a smartphone app to connect aged care residents with their families and care providers to achieve better wellbeing for aged care residents. The project will help accelerate technical development and customer service to rapidly meet customer demand.  | 9/06/2020          | 30/06/2021       | 250,000       |
| GPN Vaccines Pty Ltd  | Clinical trials of a serotype-independent Streptococcus pneumoniae vaccine for the  | GPN Vaccines is developing a lower cost vaccine against multiple strains of pneumococcal disease, which causes over 1 million deaths every year, particularly in the third world. The   | 28/06/2020         | 31/07/2023       | 1,000,000     |

|---|--|---|--------------------|------------------|---------------|
|   | prevention of pneumococcal disease.  | project will aim to complete first-in-human Phase 1 clinical trial in Adelaide to assess the safety and effectiveness of the vaccine  |                    |                  |               |
| Teamgage                                | Conversion of architectural design to support distributed data across multiple regions and supporting international languages and formats. | Teamgage is a Software as a Service (SaaS) company which develops and sells an innovative digital platform for measuring employee engagement. The project will further develop their organisational culture survey software platform for expansion into international markets.  | 29/07/2020         | 30/09/2021       | 350,000       |
| Grow 4 Pty Ltd T/A Platfarm             | Platfarm   | Platfarm provide a portable device based (mobile phone/tablet) tool to deliver easily accessed precision agriculture to farmers. The project will develop the Platfarm precision agriculture software to the level required to support a trial and rollout agreement secured with Kubota Tractors.  | 6/09/2020          | 30/09/2021       | 100,000       |
| BiomeBank (Cost-Bry)                    | Rationally designed microbial therapy development for the treatment of inflammatory conditions of the gut.                                 | BiomeBank are collecting genetically and metabolically characterised bacteria for microbial therapies aiming to treat Ulcerative Colitis, estimated to affect 4 million people worldwide. The project will create a biobank of 100 individual bacterial isolates and identify candidate organisms for a better Ulcerative Colitis therapy backed by research.   | 16/09/2020         | 31/07/2022       | 100,000       |
| Workfacta TA Global BM Platform Pty Ltd | Fast Track Global Partner Scalability Readiness Project  | Global BM Platform is commercialising its Workfacta software that equips management teams to develop and execute strategic plans. The project will support growth with a platform for distribution partners such as a leading university business school and accounting firms to onboard, manage, advise and support customers.   | 26/09/2020         | 31/12/2021       | 249,000       |
| Carina Biotech Pty Ltd                  | Optimised clinical manufacture of chimeric antigen receptor (CAR) T cells.   | Carina is developing a unique approach for CAR-T cell technology, which engineers a patient's own immune system, or T cells, to better attack and kill cancer cells. The project will develop a repeatable and stable CAR-T cell manufacturing process, at sufficient scale, to help gain regulatory approval for a Phase 1 human clinical trial to demonstrate safety of the CAR-T cell immunotherapy. | 26/09/2020         | 31/10/2023       | 750,000       |
| Makers Empire                           | Makers Empire: MakeShop  | Makers Empire gives primary, elementary and middle school teachers the tools, skills and resources to confidently teach Design & Technology curricula. The Makers Empire MakeShop will provide the ability for children, schools, and parents to  | 5/01/2021          | 31/12/2021       | 292,188       |

|   |  | access high-quality metal 3D prints. Example prints: jewellery - earrings, cuff links, keyrings, heirlooms.   |                    |                  |               |
| OneBox Holdings Pty Ltd Trading As Apxium | Development of Apxium software to support commercial rollout                                     | Apxium provides an integration platform and value-added services with demonstrated capability to expand the capability of existing practise management software for the accounting industry. The project will support a first in market integration and rollout of the APXIUM software with the top two practise management software vendors for the Accounting industry  | 14/03/2021         | 21/03/2022       | 300,000       |
| Bio-Optics Australia Pty Ltd              | Development of Woven Optics Wool testing device to support field trials with potential customers | Most of the value of wool is due to the diameter of the fibre. The company is developing a cost-effective hand-held device to measure wool diameter in real-time, using specialised digital optics and proprietary algorithms, to enable wool growers to instantly determine wool value with a fast, accurate and portable tool. The project will progress hardware and software development to enable field trials.      | 16/03/2021         | 30/06/2022       | 100,000       |
| Plasma Shield Pty Ltd                     | High-efficiency Air Bio-Decontamination Medical Device System                                    | Plasma Shield have developed a patented, filter-less air purifier, designed to efficiently purify and decontaminate air with improved removal of viruses, bacteria, fungi, odours and elimination of particulate matter. The funded project will enable product enhancements, prepare for manufacturing, implement field trials with lead customers and provide independent and credible validation of the trial results. | 8/04/2021          | 30/06/2022       | 550,000       |
| TekCyte Pty Ltd                           | Market ready manufacture facility for nanocoating of medical devices                             | Tekcyte are developing highly efficient methods and cutting-edge polymers which can be applied to medical devices to improving patient outcomes. The project will set up an advanced facility for coating medical devices with patent pending polymers, supporting an initial customer agreement with a major US based medical device manufacturer  | 8/04/2021          | 15/11/2022       | 336,600       |
| Tobruk Engineering Pty Ltd                | Behn Client Transfer Solutions Pre-commercialisation Trials                                      | Tobruk Engineering is developing an innovative "no-lift" assistive transfer system to help improve the mobility of people with severe muscular/skeletal issues, including people receiving care in their own home. Funding will complete the manufacture of updated prototypes and enable field trials for independent evaluation of the mobility assistance system.  | 10/05/2021         | 31/10/2022       | 165,000       |

| Org Name                                  | Project Title   | Project Description  | Funding Start Date | Funding End Date | Grant Funding |

| Sherlok Loans                             | Sherlok AI - home loan repricing and instant refinancing platform   | Automated tool to assist mortgage brokers in obtaining lower interest rates for their existing customers. The project will accelerate the development of the Sherlock platform developing capability which allows it to service an in-place sales pipeline.  | 24/08/2021         | 30/09/2022       | 260,000       |
| Baseline Technologies Pty Ltd             | Baseline  | The company is commercialising its Pearler web application using AI to enable more efficient completion of lengthy cyber security questionnaires. A completed project will deliver a refined software application ready for market entry and first sales.  | 31/08/2021         | 30/09/2022       | 100,000       |
| Three Peaks Medical Pty Ltd               | Development, Validation and Commercialisation of an Expandable Sheath System for use in surgical procedures | Three Peaks Medical is addressing an unmet need for reduction in vascular complication rates during interventional procedures requiring large bore access to the vascular system. The project will support Three Peaks Medical to develop a vascular access sheath that allows large bore devices to be inserted into the body through a small-bore sheath, reducing complications during surgical procedures.   | 30/10/2021         | 29/02/2024       | 664,018       |
| Aucentra Therapeutics Pty Ltd             | Phase I Clinical Trial of a Novel Targeted Cancer Therapy   | Aucentra Therapeutics is an Australian Biotech company developing targeted cancer therapeutics. Aucentra is undertaking Phase I human trials in South Australia of an oral targeted cancer therapeutic with the potential to treat a range of cancers, that are resistant to traditional therapies such as chemotherapy and address a global unmet need for advanced solid tumours such as glioblastomas.        | 31/10/2021         | 30/09/2023       | 700,000       |
| Preserve Health Pty Ltd (Prepd Hydration) | PREPD Hydration - International Expansion to the USA  | Completely different to any other sports drink, PREPD is a two-part hydration system which primes athletes for optimal fluid absorption using a special resistant starch in its patented formulations. The project will support International Expansion to the USA.  | 10/11/2021         | 31/05/2022       | 138,400       |
| Embarr Pty Ltd                            | Business expansion through optimising the product and installation process                                  | Embarr is commercialising university research with a sensor system to automatically detect bushfire threats and better control home sprinkler systems in response to the threat. Funding will be used for product design, for improving the installation process, for product testing, to develop packaging, and for developing an ecommerce capability to produce a scalable product for expanded market entry. | 10/11/2021         | 30/09/2022       | 100,000       |

| Org Name                                   | Project Title   | Project Description  | Funding Start Date | Funding End Date | Grant Funding |

| Optima Mining Systems Pty Ltd              | Commercial Scale Cutter Head System                                     | Optima Mining Systems is developing an innovative approach to mining with lower environmental impact and lower costs. The project will build, test, and refine a unique cutter head system to understand rock breakage production rate and wear rates.   | 24/11/2021         | 30/06/2022       | 100,000       |
| Splose Pty Ltd                             | Splose NDIS Practice Management Software (PMS)                          | Splose aims to be an all-in-one software solution to help NDIS Providers. The project focuses on key deliverables that NDIS Providers need such as automating service bookings and attach invoicing  | 4/12/2021          | 31/08/2022       | 100,000       |
| Seonix Pty Ltd (StratifEYE Pty Ltd)        | Novel clinical and genetic risk profiling system for glaucoma suspects. | Seonix is commercialising university research to deliver genetic risk profiling to support faster early treatment of eye disease. This project will fund key activities to launch the genetic risk score which will identify patients at highest risk of developing glaucoma, prioritising monitoring and vision saving treatment.   | 6/12/2021          | 30/06/2023       | 304,000       |
| PrioriAnalytica Pty Ltd                    | Advanced Operational Analytics for Clean Energy & Logistics             | PrioriAnalytica has developed applications that predict early-onset failures related to Solar/Battery Power Solutions. The project is to validate these solutions technically and commercially by field trials with potential industry clients.  | 18/12/2021         | 30/05/2022       | 100,000       |
| Flux Robotics Pty Ltd (no. 1)              | Commercialising AI Weed Control on South Australian Vegetable Farms     | Flux is building an ecosystem of robotics products using machine learning to help farmers increase productivity by using less pesticide. The project will scale up the company's detect-and-spray system so it can operate with the speed and ruggedness required for first sales.   | 23/12/2021         | 31/10/2022       | 100,000       |
| ConsultX Pty Ltd (trading as 'Consultmed') | Consultmed – Digital integration and interoperability                   | Consultmed is a digital referral and workflow automation platform that directly connects primary healthcare providers (e.g. GPs) with specialist clinics and hospitals networks. The project will enable its software to become interoperable with GP and hospital electronic medical record systems (EMRs) and SA Health's preferred secure message delivery system (HealthLink). | 20/01/2022         | 31/12/2023       | 100,000       |
| Ping Services (Ping Monitor Device No. 2)  | Development of continuous offshore wind turbine blade monitoring        | Ping Services has developed the Ping Monitor, a device that uses AI and acoustic monitoring to deliver accurate and cost-effective monitoring of wind turbine blades to help prevent catastrophic failure. This project will develop a continuous offshore wind turbine blade monitoring system to reduce the  | 17/02/2022         | 1/12/2022        | 270,700       |

| Lumin Sports Technology Pty Ltd      | Building the Machine (US Ready)  | Lumin is a human performance software business that provides effective physical and mental performance tools. The project will refine the software platform, engage with the target market and assemble a team for an international expansion into the US across the sports and defence offering.   | 20/04/2022         | 30/09/2023       | 500,000       |
| ICSION Medical Pty Ltd               | Regulatory and commercial rollout of novel IVF-ICSI micropipettes.         | ICSION uniquely manufacture medical devices (micropipettes) used in human assisted reproduction (IVF) techniques. The project is to rapidly source and secure customers of ICSION's micropipettes by: obtaining regulatory approvals in Europe, Australia and New Zealand; undertaking marketing activities to IVF clinics and to secure distributors.  | 9/05/2022          | 28/02/2023       | 100,000       |
| Athena Irrigation Technology Pty Ltd | Business Development and Marketing Capability Creation                     | The company is developing an innovative agtech sensor for direct and low cost monitoring of vine water stress to improve yield and reduce irrigation costs. The project will implement trials for demonstration to customers and investors and prepare for market entry.  | 9/05/2022          | 30/06/2023       | 80,000        |
| Forty2 Science                       | The expansion of scalable climate-related products for high growth markets | Forty2 Science Pty Ltd is a technology-based start-up seeking to commercialise a climate risk assessment tool to support decision-making across a wide range of government and commercial clients. The intended project is to access additional expertise to enable its product to be delivered in scalable fashion to emerging market opportunities.   | 1/07/2022          | 30/03/2023       | 100,000       |
| Kindship Pty Ltd                     | Launch and scale of the Kindship mobile app                                | Kindship is the first digital social networking app for parents raising children with disabilities. Built together with 200 early adopters, the Kindship app addresses the need for real-time and experience-informed practical and emotional support. The project will focus on the nationwide rollout of the app, accelerated user acquisition, and the co-design/development of features to drive future investment. | 4/07/2022          | 30/04/2023       | 360,000       |
| Athlete's AI                         | Development of AI-based video analytics for cricketers at all levels       | Athlete's AI is commercialising a real-time video analytics mobile app for sports, using AI. The project aims to support the continued development of AI-based video analytics software to help secure contracts with national cricket bodies.  | 9/09/2022          | 1/06/2023        | 29,447        |

|  |  | by research. The project will conduct a clinical trial in a public hospital setting.  |                    |                  |               |
| Global Movement Pty Ltd  | Validating use of a Novel Shoulder Rehabilitation Device and Smart App   | Global Movement is a medical device company that has developed a physical device to assist in rehabilitation after shoulder surgery. The product combines a tangible asset with technology applications to improve clinical outcomes and user experience. The project will develop fully functioning devices, and a basic and easy to use smartphone application, for clinical trials to show the device is safe to use in the early stages after shoulder surgery.   | 8/11/2023          | 1/10/2024        | 50,000        |
| Frigid Solutions Pty Ltd   | Establish Frigid with foundation clients to quantify energy savings      | Frigid is a subscription-based temperature control system using IoT devices and cloud computing. The company will seek to conduct trials with 20 clients to quantify the positive impact the platform has on energy efficiency and cost savings.  | 19/12/2023         | 30/12/2024       | 93,333        |
| Flux Robotics Pty Ltd (no. 2)                                      | Accelerating Go-to-Market of High Precision Weeding Technology           | Flux is building an ecosystem of robotics products using machine learning to help farmers increase productivity by using less pesticide. The aim of this project is to accelerate customer adoption by quantifying the Return-On-Investment of it's high precision weeding technology.  | 20/12/2023         | 31/08/2025       | 500,000       |
| Sequential Pty Ltd   | Sequential platform for financial institutions                           | Sequential is a fintech start up developing a SAAS platform for automation and optimisation of trust management for financial institutions. The project   | 9/02/2024          | 28/02/2025       | 100,000       |
| Organ Transport Pty Ltd, trading as Vital Organ Technologies (VOT) | Organ Angel – improved donor organ transport                             | Organ Transport is developing a medical device for improved preservation and transport of transplant organs at optimised cost. The project will refine development, support validation trials and prepare for regulatory approval.  | 20/02/2024         | 30/09/2025       | 500,000       |
| Migrova Pty Ltd  | Migrova's Machine Learning (ML)-Powered Migration Assistance Platform    | Migrova is developing a software platform to improve the transactions between validated migration agents and visa applicants including features such as secure document storage, milestone payments and capability for better matching with registered, qualified and domain-specific migration agents. The project will support Migrova to scale by automating the process of matching the needs of a migrant to a validated migration agent using Machine Learning. | 10/05/2024         | 15/04/2025       | 100,000       |
| Praxis Labs Pty Ltd  | Product/Process validation activities to scale Praxis's Structural Solar | Praxis Labs has developed a unique process to fully encapsulate solar cells in an optically transparent and strong composite structure to enable "mass-less" solar power  | 24/05/2024         | 30/08/2025       | 100,000       |

|                             |  | generation from existing structural or traversable surfaces while minimising any need for additional cost, weight, or area. The project will transform the specialised manufacturing process to reduce cost, increase capacity and improve consistency.  |                    |                  |               |
| Corcillum Pty Ltd           | CorIN platform for advanced heart artery analytics                                       | Corcillum is commercialising innovative software to automatically conduct more accurate and much faster analysis of heart artery images using artificial intelligence. The project will deliver the first stage of a heart artery analytics platform and facilitate demonstration at a leading cardiac congress to put valuable information in the hands of clinicians and analysts who need it. | 28/05/2024         | 31/12/2024       | 90,000        |
| Adeletics Pty Ltd           | AI/ML analytics to prevent pipe bursts and improve leakage reduction for water utilities | Adelitics is developing a SaaS platform using Machine Learning analytics to detect costly potential leaks and breaks in pipe networks for global water utility customers. The project will deploy the innovative analytics, with sensors for data collection, to leading Australian water utilities for trials to support commercial agreements.   | 28/05/2024         | 27/01/2025       | 80,000        |
| Cabot Knee Balancer Pty Ltd | Disposable knee balancing device for use in TKR surgery                                  | Cabot Knee Balancer is developing a disposable intra-articular knee ligament balancing device and cutting guide to enable a surgeon to accurately balance the knee through the full range of movement during Total Knee Replacement surgery. Funding will support development of the device, validation testing, and preparation for regulatory approval.  | 20/06/2024         | 31/08/2025       | 400,000       |
| Smartfem Pty Ltd            | Novel autologous graft for surgical intervention of pelvic organ prolapse                | SmartFem is commercialising the 'VictOria Generation 1 kit', which produces an autologous graft to increase the success rate of standard native tissue repair in pelvic organ prolapse surgeries. The project includes obtaining regulatory approval, additional independent clinical evaluation and market entry activities.  | 8/07/2024          | 31/03/2027       | 500,000       |
| Paladin Space Pty Ltd       | Space Debris: Characterising and Capturing a Deadly Threat                               | Paladin Space is developing an innovative satellite payload with a reusable method for identifying, capturing and removing destructive space debris. The project will develop artificial intelligence to enable the capture of space debris and trial the system prototype in a lab demonstration.   | 06/09/2024         | 30/09/2025       | 100,000       |
| Cropify                     | Export Market Validation   | Cropify is solving a global pulses and grain supply chain challenge by utilising artificial intelligence and machine learning  | 18/09/2024         | 20/06/2025       | 60,000        |
